

HEALING AFTER TOOTH EXTRACTION WITH KLIRICH GEL APPLICATION

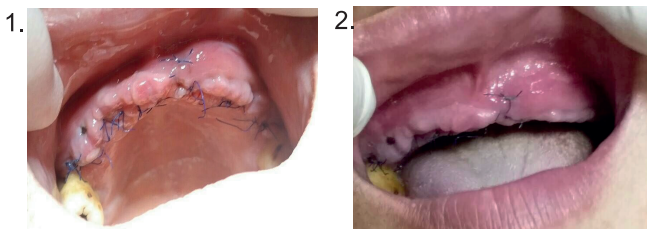

DRASTIC HEALING WITHIN 5-7 DAYS

Klirich® helps to relieve gingivitis stomatitis and associated symptoms such as bleeding or swelling. Indeed, Klirich® relieves pain, sanitizes the gum while decreasing the rate of bacteria. Its film-forming texture adheres to the mucous membrane for a maintenance in the mouth.

INFLAMED AND NECROTIC SOFT TISSUE HEALS 72 HOURS AFTER 4 TIMES KLIRICH APPLICATION PER DAY.

1. UNEVENTFUL GUM HEALING AFTER IMPLANT SURGERY.

2. 72 HOURS AFTER 4 TIMES KLIRICH APPLICATION PER DAY.
